

RehabMart and BioXtreme sign distribution agreement

BioXtreme is proud to announce a new distribution agreement was recently signed with RehabMart from Watkinsville, GA. The agreement situates RehabMart as BioXtreme's representative in US, with distribution rights for BioXtreme's neurorehabilitation products and forming connections with hospitals and rehabilitation centres in the country.

BioXtreme has developed a ground-breaking robotic device for motor-learning, based on innovative error enhancement technology for upper limb rehabilitation of stroke and other neurological injuries. RehabMart is a distinguished distributor for healthcare products in the American market, dedicated to serve patients, families, and caregivers by offering a wide selection of innovative rehabilitation products.

Within the scope of the agreement, RehabMart will sell BioXtreme's innovative neurorehabilitation solutions through a dedicated Occupational Therapist, will showcase the products in industry events in the US and conduct a range of sales and marketing activities.

About RehabMart:

Rehabmart, a leading provider of medical supplies, rehabilitation products, and healthcare technologies, is dedicated to empowering individuals and caregivers through innovative products and exceptional customer service. Founded by Occupational Therapists Mike Price and Hulet Smith, both fathers to special needs children, Rehabmart understands the unique challenges faced by families and healthcare providers. With a mission to promote independence and improve function, the company offers a wide range of cutting-edge products from over 700 manufacturing partners. Rehabmart's commitment to superior customer service, fair pricing, and educational resources has made it a trusted partner for families, clinics, hospitals, schools, universities, and governmental agencies.

About BioXtreme:

BioXtreme Rehabilitation Robotics is instilling new dexterity for stroke and other neuro injuries patients. Using a patent-protected groundbreaking Error Enhancement technology, BioXtreme has developed a robotic system that performs upper limb motor rehabilitation. Our product, deXtreme™ preforms automatic rebuild of motion range and capability through adaptive/intuitive learning. Based on unique robotic system that applies Error Enforcement forces, BioXtreme technology helps reprogramming the mind for extreme performance.
